VOICE AUTOMATED CHECKLIST WORKFLOW
Enhance productivity for the frontline workforce.

CHALLENGE

Companies know the key to productivity is ensuring routine procedures are followed consistently across their frontline workforce. Checklists and Standard Operating Procedures (SOPs) are business critical functions but are often driven by paper-based or manual workflows that result in cumbersome extra steps for on-the-go workers.

SOLUTION

Orion enhances efficiency and compliance by voice automating Checklists & SOPs for frontline workers with our proprietary Frontline AI. The Orion Voice Automated Checklist & SOP Workflow transforms any repetitive task into voice-activated checklists and also reports insights instantly into operations systems of record — mitigating risk while saving time for both workers and management.

Checklists and standard operating procedures (SOPs) are part of frontline jobs every day, but filling out forms and checklists can slow down worker productivity. Get SOPs done faster by transforming your organization's existing manual (often paper-based) processes into voice-powered automations driven by Orion's innovative Frontline AI.

Industries spanning Hospitality, Retail, Manufacturing, Logistics, Security, and more all realize the benefits of adopting our Voice Automated Checklist Workflow.

Voice Automated Checklist Workflow

• Stronger procedural adherence
• Faster SOP completion
• All-digital recordkeeping
• Real-time alerts for failed SOPs
• Reduced screen time for workers
• Automated management tasks

Automate Any Task

• Start-of-service checks
• Equipment check-out
• Environment & equipment cleaning
• Training for new workers
• Work environment inspections
• And more

Checklist Workflow is easy to use

1. With a mobile device, speak the trigger phrase (ex., "Begin an Equipment Check")

2. Listen for prompts and speak short answers

3. Put device away and resume work
   (Checklist Workflow reports are instantly transcribed and transmitted to management).
