

Orion Onyx

Onyx: A Smart, Wearable
Push-to-Talk Accessory

Our innovative and unique wearable helps frontline teams access voice-driven process automation and stay in touch with teams — all while focusing on the work at hand.

The Orion Onyx is the award-winning wearable that uses the power of voice to help frontline teams stay focused and get more done. **Dispersed or on-the-go frontline workers** uphold professional appearance standards and gain greater flexibility in how they communicate with their teams or activate **Orion's proprietary Voice AI Workflows**.

Retail associates use voice to query the real-time information they need to maintain a superior customer experience. **Hospitality staff** remain heads up and engaged with guests without needing to access their phone. **Healthcare teams** stay connected while following safety protocols. **High-tech manufacturing workers** seamlessly access voice-driven process automation that makes their work more efficient and safer.

Onyx provides all the benefits of the Orion AI Workflow Platform and makes communicating as simple as the touch of a button. **Frontline teams use Onyx to invoke Voice AI Workflows as systems of action to update corporate or operational systems of record.** This sleek device ensures teams stay connected and productive while their phones stay in their pocket.

ORION ONYX

- Use with Orion's library of Voice AI Workflows.
- Deliver push-to-talk voice messages over cellular and wireless networks in real time.
- Fully end-to-end encrypted.
- Depend on unlimited range via the Orion Voice AI Platform.
- Pair with iOS and Android phones.
- Enable use cases across Retail, Hospitality, Healthcare, and High-tech Manufacturing.
- Use the built-in speaker and mic or with a headset or earpiece for private or covert communication.
- Integrate with a breadth of accessories.
- Enjoy a 12+ hour battery life and fully recharge in under an hour.

We're proud to say the Orion Onyx is unlike any other device on the market and transforms how your frontline workforce communicates and operates.

Our patented wearable allows you to invoke one of our Voice AI Workflows or talk instantly with one person or multiple people at once. Frontline workers easily use the Onyx via a single push of the button without ever having to access or unlock their phone screen. Unlike other wearable devices, the Onyx is augmented by the Orion platform's unlimited range over Wi-Fi or LTE, so your team can communicate from anywhere.

Orion Onyx

Onyx: A Smart, Wearable Push-to-Talk Accessory

An Accessory That Lets You Keep Your Focus

Talk, adjust volume, and set to "Silent" all by feel — without breaking focus or looking down. Onyx makes communication easy and intuitive, even for users who are new to push-to-talk.

A Smart Device That Helps Your Team Get More Done

Activate Orion Voice AI Workflows for even greater productivity. We offer a suite of off-the-shelf or customizable voice-automated workflows that listen, participate, and automate processes on Orion's communication platform or in concert with existing communication systems.

No Limits and Unlimited Distance

Onyx is the push-to-talk accessory that works on any network, with any device, over any distance. There are no limits on the number of people, conversations, or channels you can create.

An Accessory That Fits Your Work Style

The award-winning Onyx is available in neutral or eye-catching colors to suit casual or dressy environments. It's the best-looking PTT wearable you can get. And you can wear it your way: Onyx clips onto a lapel, pocket, belt, or strap. You can also plug in a headset or earpiece for discreet communication in public environments.
