

# Orion Radio Bridge-as-a-Service

Interoperate Between Radio Users and Orion Talk Groups

Enable your advanced communications platform to interface with your legacy radio systems with Orion Radio Bridge-as-a-Service.

## Orion Radio Bridge-as-a-Service Empowers You To:

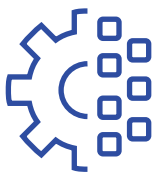

### Connect Radios to Orion Talk Groups

Enable your legacy radios to interface with Orion's voice-first collaboration software.

### Turn Radio Users Into Connected Workers

Start connecting your frontline teams to the rest of your digital organization.

### Augment and Digitally Transform at Your Pace

Begin your digital transformation without excluding your existing investment or compromising interoperability.

### Get Added Value From Your Infrastructure Investment

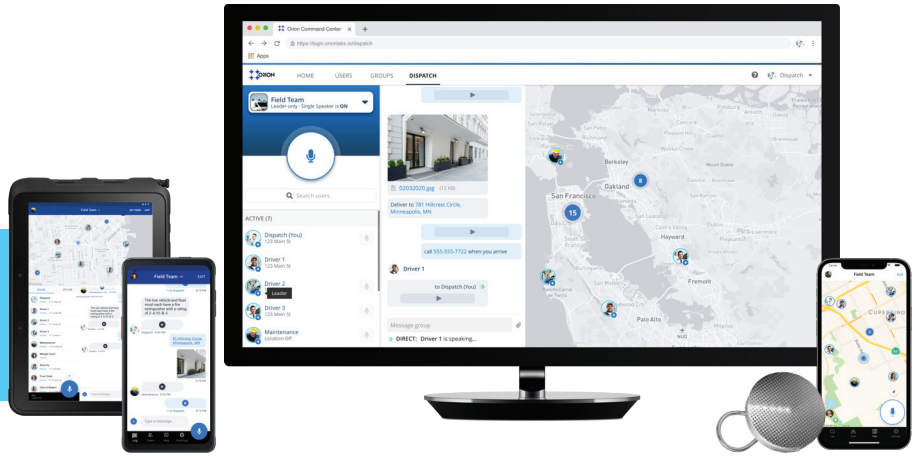

Upgrade now to innovative collaboration technology as you get the most out of your existing systems.

*"At a past event, we tested the LTE connected solution from [major radio vendor], and nobody on the team wanted to use it. When we deployed Orion's enterprise voice and advanced location services at our biggest annual event, we saw a huge difference in adoption. Our teams enthusiastically adopted Orion, and we immediately expanded our use beyond the original scope."*

— Radio System Owner at Fortune 100 Technology Company, Migrating from Land Mobile Radio (LMR)

## Connecting the Deskless Workforce

Orion enables digital enterprises to move beyond multiple devices and current legacy communication tools with voice-first, multimodal collaboration.

### HIGH-QUALITY VOICE

Communicate with HD-quality voice with extremely low-latency push-to-talk (PTT) that works even on low-bandwidth connections.

### ANY NETWORK

Communicate over any network, including LTE (5G-ready), private LTE (CBRS), Wi-Fi, satellite, and mesh.

### ANY SIZE GROUPS

Enable unprecedented collaboration for your deskless worker teams with unlimited dynamic group creation, 1:1 talk modes, and instant mass communication capabilities.

### ANY DISTANCE

Communicate over any distance, including onsite, on the road, across town, or around the globe. And certainly don't worry about floors, stairwells, or concrete walls.

### ANY DEVICE

Enjoy the broadest range of device support, including any radio and smart and/or ruggedized devices running Android, iOS, Windows, or browsers.

### END-TO-END ENCRYPTION

Utilize enterprise-grade end-to-end encryption (E2EE) and security within the Orion network to protect your proprietary and sensitive information, communications, and — most important — your connected workers.
